

## FP Sign

### Breaking new ground with digital signatures

The working world of today is digital and mobile. A consequence of this is that files and documents to be signed often pile up following a business trip. But it doesn't have to be this way!

**FP Sign** is the digital signature solution that enables digital transactions between two or more recipients or contract partners from any device and in just a few clicks. Documents can be signed and sent from anywhere within minutes.

#### FP Sign signature levels

- Advanced electronic signature, sign personally or through an intermediary
- Qualified electronic signature, sign personally or through an intermediary, also via remote signatures in cooperation with Bundesdruckerei and SwissCom (both eIDAS certified)
- Qualified electronic signature via SSEE hosting and support of existing signature infrastructures
- Qualified electronic seals, also via remote seals in cooperation with SwissCom (eIDAS certified)

#### Momentum to help you grow

With **FP Sign**, you can simplify signature processes drastically, increase the operational excellence of your organisation and reduce costs – but there's more. **FP Sign** also combines secure communication and maximum user-friendliness.

And best of all, **FP Sign** doesn't require any hardware! Accelerate your growth and make life easier for yourself, your organisation and your customers by using **FP Sign**.

##### Workflow management

Fast digitalisation of contract and approval processes and digital exchange instead of costly and time-consuming manual steps

##### Operational excellence

Simplification of complex processes and simple administration and unlimited mobility

##### Cost management

Enormous cost and time savings

## Digital signatures without hardware – FP Sign features:

- Visible optical signature including signature information
- Comprehensive test logs on integrity and origin
- Connection of the sign-me remote signature solution from Bundesdruckerei
- Digital identity verification via VideoIdent with “Identity Trust”
- Multifactor authentication
- Flexible user, role and rights system
- Delegation, mailbox assignment and substitution function
- Connection of customer-specific mail servers and signature units
- Access via a web portal or integration into existing applications via an API
- Registration with new identity card (nPA)
- Workflow document folder for attaching documents in a workflow
- Use of electronic seals as an additional signature option
- **FP Sign** white labelling
- On-premise installation possible
- Connection of the remote signature and remote seal solution of SwissCom’s all-in signing solution
